

THP Services are recruiting for a Test and Service Technician to join our fast-growing independent Test Lab and Services team.

THP Services is an independent Test Lab that has a variety of Test Systems that aid customers in their Test & Measurement protocols for their products.

THP Services also provides Servicing, Repairs and Calibration of Test and Measurement Equipment and Systems such as Environmental Chambers, Vibration Test Systems, Shock and Drop Systems and sensors which customers use to test products in a wide range of markets including Automotive, Military, Telecoms and Aerospace Industry.

THP Services are offering an exciting opportunity for a diverse role in the Environmental Engineering environment whereby as well as supporting in house Testing in the THP Services Test Lab, you will be supporting on-site Services, Repairs and Calibrations of customers Systems across the country.

Mandatory

- Full and Clean UK Driving License.
- Ability/Flexibility for regular travel.
- Confidence and ability to be hands-on with equipment including using tools and Instruments.
- 5 GCSES Grade A-D.

Desired

- Qualifications in Electronics, Engineering or Mechanics.
- Experience working with customers or a strong ability to communicate.
- Experience working in an Engineering Company or Test House.
- Ability to work in a small team as well as independently.

Roles

- Assisting in Planning and Performing of Manual and Automated Tests using a variety of Test Systems in the THP Test Lab by following customer Test Specifications and Protocols.
- Performing hands-on tasks that surround Testing such as removing products off Test Systems and Re-setting/installing products on Test Systems for Testing.
- Supporting the completion of Test Reports post Testing.
- Assist in maintaining a safe Test Lab by working alongside colleagues in organising Equipment Calibration and Inventory requirements.
- Liase with Customers to understand their Testing requirements and needs, including booking them in for Testing in the Test Lab Calendar.
- Produce quotes for Customers for Testing.
- Undertake Servicing, Repairs and Calibrations of Customer Test Systems to International Standards and Specifications requested.
