

VIBRATION TESTING

OUR EQUIPMENT. YOUR SUCCESS.

V-SERIES™ TRANSPORTATION SIMULATOR

L.A.B. Equipment, Inc.'s, V-Series™ Transportation Simulators are used to determine the ability of packages and products to withstand shock and vibration encountered during the typical transport environment. Our transportation simulators use three methods of motion; rotary or circular synchronous motion, vertical linear motion and non-synchronous motion to provide you with the tools you need to meet your specific requirements.

Applicable Test Standard Compliance

- ISTA 1A, 1B, 1C, 1D, 1E, 2A, 2B
- ASTM D999
- ISO 2247
- Mil Std 810G
- TAPPI, JIS, UN, Fed Std 101

Other corporate specific, internationally and industry recognized standards.
